

## **Board Action Request**

**SUBJECT:** Cardiac Monitor Brackets

**DATE:** 8/25/2021

**FROM:** Deputy Chief Ben Guerrero

---

**Background:** In January 2021 Tubac Fire purchased 4 cardiac monitors. The monitors are currently secured in our units using seat belts that are not intended to secure the device. This can lead to the damage of expensive equipment as well as cause the unsecured equipment to become a flying projectile in the event of an accident. There is now mounting hardware available to secure our monitors to our current iNX power cots.

**Fiscal Impact:** The total cost of purchase for 4 cardiac monitor pole mounts \$6,511.02 and is available in the capital reserve.

**Alternate Option:** Board recommendation

**Staff Recommendation:** Recommend approval for the purchase of 4 Philips Tempus Pro cardiac monitor pole mounts.

**Proposed Motion:** Move to authorize the purchase of 4 Philips Tempus Pro cardiac monitor pole mounts in an amount not to exceed \$6,511.02.
